

Course vacancy at HEC Liège: “Retail and distribution management.”
--

The Operations Department of HEC Liège (University of Liège) is looking for a visiting lecturer, co-holder (15 hours), for the course “Retail and distribution management”.

Programme:

Master in Management, specialisation in Global Supply Chain Management.

Course:

The course “Retail and distribution management” will be divided into two parts.

- *Part “Warehouse Management and Routing”* co-holder: Sabine Limbourg (15h)
The scope of this part is to highlight the most important theories, concepts, models and methods in order to identify, describe, analyse and design diverse solutions for physical distribution of goods. The course will furnish an understanding of the critical role played by warehouses, facilities in the supply chain where product pauses and is handled. One goal of this lecture is to use mathematical models to allow to reduce space and time requirements or to exchange one for the other. This course also treats the fundamental topics of distribution such as the travelling salesman problem, the pickup and delivery problem, the vehicle routing problem, third and fourth-party logistics.
- *Part “Retail”* co-holder: “Visiting lecturer” (15h)
Expected content:
 - Distribution channel strategy
 - Relevant processes/concepts to develop distribution channels
 - Key activities, roles and stakes of the main actors in the distribution channels
 - Components and success factors of modern distribution management
 - Distribution and supply chain management
